

Information regarding the implementation of statutory requirements pursuant to the Regulation (EC) 1907/2006 (REACH Regulation)

(Registration, Evaluation, Authorisation, and Restriction of Chemical Substances)

As a manufacturer and distributor of products governed by the REACH Regulation (electronic assemblies, modular rack-mount systems for electronics and electrical technology, complete systems), ELTEC Elektronik AG is a so-called "downstream user". As such, we are, as a matter of principle, not subject to any registration requirements pursuant to REACH.

The products you are procuring from us at this time are hence also not subject to mandatory registration pursuant to REACH. We are currently not utilizing any substances that would require mandatory registration, nor do we plan to do so in the future.

To our customers we are subject to the information requirements under Art. 33 of the REACH Regulation, as long as a product supplied by us contains a substance of very high concern (SVHC) in a mass concentration of more than 0.1 percent.

The list of SVHC substances is subject of permanent change. It is published on the website of the European Chemicals Agency (ECHA)

<https://echa.europa.eu/en/candidate-list-table>

As a matter of principle, suppliers of products are required to provide to their customers – without having to be prompted to do so – with information on substances and preparations that have been categorized accordingly, if same reach a weight percent concentration of > 0.1 in a product. For reasons of protecting confidentiality and to avert the generation of red tape, the REACH Regulation does principally not call for the provision of negative notices.

We do monitor the implementation of REACH and any resulting requirements intensively, as this is in our own best interest.

Consequently, we have sent notices to all of our suppliers early-on to make them aware of these circumstances and have combined these communications with the request to pass this information on down the supply chain all the way to the original manufacturer of the chemical substances.

Consequently, we shall notify you, our customer any time products we deliver to you do meet the aforementioned criteria for products, without having to be prompted to do so. Please understand that this information letter is designed to respond to inquiries regarding REACH.

In the event that you should have further questions pertaining to the implementation of the REACH Regulation in our company, we will be pleased to assist you at any time.
